Gender: Male   **Date of birth:** 20/04/1997   **Nationality:** American

ABOUT ME

I am a full-stack web developer with two years of professional experience.

WORK EXPERIENCE

[22/08/2019 – Current]   **Full-Stack Web Developer**

DocResponse

City: Houston
Country: United States
Main activities and responsibilities:
Research new technologies in order to enhance the web application's performance
- Migrated codebase from Angular to React
- CSS frameworks (such as tailwind)
- Took a course on Machine Learning from Standford University to apply to DocResponse's digital check-in solution

Front-end Design
- Researched and implemented improved UI/UX practices to improve application usability
- Experienced in mocking up new implementations of the current UI/UX for team-wide discussions

Front-end Development
- Worked extensively with Angular to build professional-level web application features
- Worked with Symphony Twig to create HTML / SCSS / jQuery pages.
- Worked with React to migrate existing Angular components to a more popular framework

Back-end Development
- Created new APIs to connect with existing third party entities (EHRs in a medical space)
- Managed database structures
- Created entirely innovative functionality within the medical digital check-in space

DIGITAL SKILLS

React | Angular | PHP | HTML5/CSS, Javascript | MySQL | Typescript | JQuery | PHP Symfony | Node.js/Express | Git

EDUCATION AND TRAINING

[27/07/2015 – 26/04/2019]   **BS in Mathematics**

University Of Texas at Austin   utexas.edu

Address: 2515 Speedway, Austin, Texas, United States
